

WHAT IS CLAIMED IS:

1. A personal information storage device comprising:  
information storage means for storing personal information and electronic money information;  
short-distance communication means for making short-distance communications in a noncontact manner;  
pair relationship establishment means that receives a pair relationship establishment request signal from a mobile terminal by said short-distance communication means and transmits personal identification information to said mobile terminal by said short-distance communication means; and  
information providing control means that receives electronic money information from a financial institution terminal by said short-distance communication means and transmits said electronic money information by said short-distance communication means to a mobile terminal with which said pair relationship has been established.
2. The personal information storage device according to Claim 1, wherein said information providing control means receives an electronic money increase request signal of a predetermined designated amount of money from said mobile terminal by said short-distance communication means and transmits an electronic money increase signal of said designated amount of money to

a mobile terminal by said short-distance communication means.

3. The personal information storage device according to Claim 1 or 2, wherein said personal information storage device is integrated with something that a user wears.

4. A mobile terminal comprising:

short-distance communication means for making short-distance communications in a noncontact manner;

pair registration means that transmits a pair relationship establishment request signal to a personal information storage device by said short-distance communication means, receives personal identification information from said personal information storage device by said short-distance communication means, and registers said personal information storage device as having a pair relationship;

user setting means for setting and storing personal information including electronic money information by receiving it by said short-distance communication means from said personal information storage device registered as having the pair relationship; and

use permission means that transmits a use permission request signal to a personal information storage device set as having the pair relationship by said short-distance communication means, receives a use permission signal from said

personal information storage device by said short-distance communication means, and makes this mobile terminal available.

5. The mobile terminal according to Claim 4, further comprising electronic money increase means that designates a predetermined amount of money and transmits an electronic money increase request signal by said short-distance communication means to a personal information storage device set as having a pair relationship, and receives an electronic money increase signal of said designated amount of money from said personal information storage device by said short-distance communication means and stores it.

6. The mobile terminal according to Claim 4 or 5, wherein said pair registration means transmits a pair relationship establishment request signal addressed to an arbitrary personal information storage device, and said use permission means transmits a use permission request signal addressed to a specific personal information storage device.
